

July 1, 2010

Dear Dr. Rosquist,

In December of 2009 my wife and I were driving to Sandy from our home in Lehi. We were hit by a drunk driver who was travelling over sixty miles an hour. She hit us broadside on my side of the truck.

When I woke up in the hospital, after being carried by Life Flight to Intermountain Hospital, I knew that my life had just changed in a very significant way. I needed neck, leg, finger and ankle surgery. I also had several broken ribs and lots of bruising and cuts.

After multiple surgeries, I was still having trouble healing. It was impossible to turn my neck or bend my ankle. Walking without pain was also impossible.

We heard about your Laser treatment and decided to give it a try. The results have been fantastic. I can move my neck freely and totally without pain. I can also walk comfortably without the nagging ankle pain that I have lived with for many months.

I've always enjoyed a very active lifestyle and being laid up and crippled was a difficult thing to deal with. Being pushed around in a wheel chair while I was on vacation with my family was particularly difficult for me.

But thanks to your Laser treatment I'm back doing the things that I love. I am enjoying my old life again. Thanks for all of your great help.

I started the treatment with a very skeptical attitude. But I felt that I had nothing to lose. Now I understand how the Laser can speed the healing process. I can recommend the treatment without reservation.

Thanks again for all your help,

Steve Davis

Lehi, UT
