

My name is Mike Julian. I first called Dr. Roquist for some info on my neck problems. I had seen him in the past for other problems and he was the only Dr. I'd seen who was honest and up front with me. He didn't use medical terms that I didn't understand and make me feel inadequate to deal with my problems. He asked me to come in and see him for a free evaluation before I considered surgery. I'd already had one surgery on my neck and the problem was progressing. I saw Dr. R the next day and he suggested I try laser and decompression therapy with him and Dr. Atkinson before I went to the extremes of another surgery. It was absolutely amazing!!!! With Dr. R's and Dr. A's **caring** treatment within days I was not only walking taller, but was feeling relief from the pain I'd been having for almost 3 years!! My mental attitude even started changing...it was truly astonishing. Now, after only about 2 months of treatments I am virtually pain free! I do minimal follow up treatments myself at home and I thank God that I called Dr. R before proceeding with another costly and debilitating surgery.

If you're in a similiar situation, I urge you to at least give this type of treatment a try! Make sure to follow any instructions they give you to the letter and you'll be astounded at the results.

I want to thank Dr. Roquist and Dr. Atkinson from the bottom of my heart...not only for the treatments, but for their empathy and support....it is so much appreciated!

Sincerely,

*Mike Julian*
